DETAILED ACTION

1. Applicant's Reply, filed 4/19/06, is acknowledged.

Given that no restriction requirement or requirement for species has been issued in this application and no election of invention or election of species has been made in this application,

the following election of species are set forth.

Applicant is reminded that the species "psoriasis" has been prosecuted in this application and would be considered the species originally presented in this application.

Applicant's reference to an interview with the examiner on 10/19/05 concerning amending the claims to recite treating acute/chronic inflammatory and immune processes/disease supported by priority application USSN 07/670,817 is acknowledged.

However, the examiner believed that such amendments would occur with the filing of a RCE, when the filing was appropriate.

The examiner apologizes for any inconvenience to applicant in this matter.

2. Claims 3, 14-15, 17-18 and 20-35 are pending.

3. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the methods of treating are directed to treating acute/chronic inflammatory and immune processes/disease selected from the group disclosed on pages 57-59 of the instant specification.

These species are distinct because these diseases differ in etiologies and therapeutic endpoints.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

4. In addition to Section 3 above,

this application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the methods further comprises "therapeutic agents" selected from claims 29-31.

These species are distinct because the therapeutic agents differ in structures, targets and modes of actions.

Art Unit: 1644

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 3 is generic, for example.

5. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
